

OECEM's Newest Facilities and Operations Agreements

Click agreement titles to view full details online.

Automatic Door Operators, Electromagnetic Door Holders and Hands-free Switches/Sensors for Doors

Access a wide range of products and services, including optional services, related to door hardware and operators. Awarded supplier partners can provide products within three distinct categories: Category A (Automatic Door Operators), Category B (Electromagnetic Door Holders), and Category C (Hands-free Switch/Sensor Products for Doors).

Commercial Air Treatment Technology, Related Products and Optional Services

Supporting clean air in environments with large groups of people, these agreements provide access to the latest commercial stand-alone and in-duct air treatment products with an additional technology, (e.g. LED, plasma, bipolar ionization, UV light, or others), related products and optional services.

Commercial Ductwork Sealing and Related Services

Access to a range of ductwork sealing and related services suitable for various buildings including schools, colleges, universities, municipal buildings, and more.

Electrical Products

Access to a wide range of electrical products from pre-qualified supplier partners, as well as related services to help you save time and money.

Roofing Consulting Services

Access to a Vendor of Record (VOR) arrangement offering a wide range of services for design, specification, and related consulting services relevant to roof repair, restoration and/or replacement suitable for a variety of building roof systems.
