PART 1 – INTRODUCTION

This non-binding Request for Supplier Qualifications (“RFSQ”) is an invitation to obtain Proposals from qualified Proponents for Professional Engineering Services – Mechanical & Electrical (“Services”) for the purpose of pre-qualifying prospective Suppliers and creating a Vendor of Record (“VOR”) arrangement for OEMC Customers, as defined in Part 1A.2 Definitions, to use on an as-and-when required basis. Refer to Part 2 of this RFSQ for a full description of the requirements.

Master Agreements will not be awarded by a particular geographical area. The Proponents will, however, identify the Ontario Region, County, District, or Single-Tier location (refer to Appendix E) where it is able to provide Professional Engineering Services – Mechanical & Electrical. This information will be shared with Customers, post award, to support their Second Stage Selection Process (“Second Stage”).

This RFSQ does not require the Proponent to submit pricing. During the Second Stage, the Customer will further define their requirements, and specifications and request pricing accordingly. Only Suppliers who are awarded Master Agreements resulting from this RFSQ will be eligible to participate in any such Second Stage. The Second Stage, further outlined in Section 1.4.3, provides opportunities for Suppliers who have the capacity and relevant experience.

This RFSQ is issued by OEMC.

1.1 Objective of this RFSQ

The objective of this RFSQ is to:

- (a) Establish a list of pre-qualified, quality Suppliers able to provide a wide range of Mechanical and Electrical Professional Engineering Services to OEMC Customers;
- (b) Attract and award local qualified Suppliers across the province;
- (c) Inform Suppliers of the Customer’s Second Stage process;
- (d) Provide Customers with professional and responsive customer support; and,
- (e) Reduce the costs of associated competitive procurement processes on an ongoing basis (i.e., fewer of the same, competitive procurement documents issued by Customers).

1.2 Supplier Experience and Qualifications

The Supplier shall:

- (a) Possess appropriate experience, qualifications, and demonstrated knowledge relative to the requirements in this RFSQ; and,
- (b) Ensure its employees performing engineering Services possess an active Professional Engineers Ontario (“PEO”) licence and the Supplier shall have a Certificate of Authorization in accordance with the *Professional Engineers Act*.

1.3 Project Background

1.3.1 Current OEMC Agreements

OEMC currently has Mechanical and Electrical Engineering Services agreements in place with four (4) suppliers that expire in February 2024.

1.3.2 Customer Engagement

A variety of Customers were engaged with the development of the Deliverables set out in this RFSQ.

Customers are **not**, in any way, committed to participating in the Master Agreement resulting from this RFSQ.

1.4 Award Strategy

OECM may, through this RFSQ process, enter into Master Agreements with one (1) or more Suppliers for the provision of the Services in Ontario.

The Term of the resulting Master Agreements are intended to be for five (5) years, with an option in favour of OECM to extend the Term on the same terms and conditions for up to three (3) additional years. Performance as set out in Appendix C – Supplier Performance Management Scorecard and, if applicable, Supplier Recognition Program evaluation results will be considered when contemplating a Master Agreement extension.

According to applicable trade agreements, OECM will refresh this RFSQ by providing other suppliers an opportunity for inclusion annually. The refresh process requirements will be aligned with this RFSQ. Should additional suppliers be added during a refresh process, all Master Agreements will be co-terminus.

Customers participating in the Master Agreements will execute a Customer-Supplier Agreement (“CSA”) with a Supplier as attached in Appendix A – Form of Master Agreement. Prior to executing a CSA, the Customer will negotiate their unique requirements and further negotiate with the Supplier and mutually agree to additional terms and conditions (e.g., reporting, Rates specific to the Customer’s requirements) ensuring the additional terms and conditions are not in any way inconsistent with the Master Agreement agreed to by OECM and the Supplier.

The Supplier must provide a copy of every CSA to OECM within thirty (30) days of execution.

1.4.1 Geographical Locations

OECM Customers, in Ontario, are located in Region, County, District, or Single-Tier locations.

Also, refer to Appendix E for more information about these geographical locations.

1.4.2 No Contract until Execution of Written Master Agreement

This RFSQ process is intended to identify Proponents for the purpose of negotiation of potential Master Agreements. The negotiation process is further described in Part 3 – Evaluation of Proposals, Section 3.4 of this RFSQ.

No legal relationship or obligation regarding the procurement of any Services shall be created between the Proponent and OECM by this RFSQ process until the successful completion of negotiation and execution of a written Master Agreement for the provision of the Services has occurred.

The Master Agreement must be fully executed before the provision of any Deliverables commences.

1.4.3 Customer's Usage of Master Agreements

The establishment and use of the Master Agreement consists of a two (2) part process.

Part One, which is managed by OECM, is the creation of the Master Agreement through the issuance of this RFSQ, the evaluation of Proposals submitted in response to it, and the negotiation and execution of the Master Agreement.

Part Two, the Second Stage is managed by the Customer or by OECM on the Customer's behalf and is focused on the Customer's specific needs as it relates to their Mechanical and/or Electrical Engineering Service requirements. Depending on the Customer's internal policies, and the potential dollar value of the Services a Customer may:

- (a) Select a Supplier and sign a CSA; or,
- (b) Seek Rates and other relevant Service information specific to a Customer's organization (e.g., by issuing a non-binding request via a Second Stage tool (e.g., Request for Services ("RFS")), or Customer's process (e.g., directly or via an online e-tendering platform)) from the Supplier for their specific Service requirements (e.g., site visits, scheduling, Environmental, Social and Governance considerations (e.g., the Supplier's program/policies, codes of conduct, or procedures as it relates to environmental responsibility, social impact, sustainability and climate change), reporting, Rates, invoicing). If selected by the Customer, the Supplier shall provide the Services in accordance with the specifications stated in the Master Agreement and in the Customer's CSA.

For example, a Customer may issue a Second Stage that requires the following:

- i. Service requirements for the generation of complete design and specifications, including all construction documentation for the replacement of three (3) existing 10-ton roof-top HVAC units at one (1) location. Services will also include:
 - Support in the procurement process to identify contractors;
 - Obtaining all permits required by authorities having jurisdiction;
 - Project management;
 - Coordination with Customer Building Automation Systems (BAS) contractor;
 - Project close-out; and,
 - Ensuring all project deficiencies are completed.
- ii. The Supplier shall provide:
 - Proof of licensing and Certificate of Authorization in Ontario;
 - Errors and Omissions insurance of \$5,000,000;
 - Experienced professional engineers assigned to the project, including resumes illustrating their experience, familiarity, and experience with the types of systems being considered, experience being the prime consultant including construction administration and contract documentation (e.g. Canadian Construction Documents Committee ("CCDC"), Construction Act), commitment to meet Customer's timelines, experience, and knowledge with incentives/applications, ability to provide lifecycle costing information and comparisons of different proposed systems;
 - The recommended number of site visits;
- iii. Proposed Rates shall be a percentage of the total project cost, excluding Harmonized Sales Tax ("HST").

When a Second Stage request is issued, which does not constitute a contract A, contract B situation, it will identify the required Services or it may request the Supplier to propose appropriate Services to fulfill the Customer's requirements and any other applicable information.

The Customer may negotiate their unique requirements (e.g., site visits, scheduling, reporting, Rates, invoicing) with the Supplier and mutually agree to additional terms and conditions ensuring the additional terms and conditions are not in any way inconsistent with the Master Agreement.

The Supplier must respond to a Second Stage request and, at minimum, the response should set out the following:

- (a) Proposed Services and workplan; and,
- (b) Final, net Rates. The Rates should be valid for a period of not less than ninety (90) days or as requested by the Customer (e.g., not less than one-hundred and twenty (120) days).

1.4.4 No Guarantee of Volume of Work or Exclusivity of Master Agreement

The volume information contained in this RFSQ constitutes an estimate and is supplied solely as a guideline to the Proponent. Such information is not guaranteed, represented, or warranted to be accurate, nor is it necessarily comprehensive or exhaustive.

Nothing in this RFSQ is intended to relieve the Proponent from forming its own opinions and conclusions with respect to the matters addressed in this RFSQ. Volumes are an estimate only and may not be relied on by the Proponent.

OECEM makes no guarantee of the value or volume of work to be assigned to the Supplier.

The Master Agreement executed with the Supplier may not be an exclusive Master Agreement for the provision of the Deliverables. Customers may contract with others for the same or similar Deliverables to those described in this RFSQ.

Stage III	Negotiations	3.4	Not Applicable	Not Applicable
Stage IV	Master Agreement Finalization	3.5	Not Applicable	Not Applicable

3.2 Stage I – Review of Qualification Responses (Pass/Fail)

Stage I will consist of a review to determine which Proposals comply with all qualification requirements.

The Proponent **must** complete the following forms in OTP to qualify and proceed to the next stage of evaluation.

Only Proponents satisfying the identified deficiencies within the allotted time will proceed to Stage II.

Other than inserting the information requested on the qualification submission forms set out above, the Proponent may not make any changes to any of the forms. Any Proposal containing any such changes, whether on the face of the form or elsewhere in the Proposal, may be disqualified.

3.3 Stage II – Technical Response

Detailed sub-point allocations and minimum thresholds are set out in the Technical Response on OTP.

In the case that contradictory information or information that contains conditional statements is provided, OECM will determine whether the response complies with the requirements, and may seek clarification from the Proponent.

A Proposal that does not respond to a particular question (e.g., it is left blank) or contains a response of N/A or not applicable will receive a zero (0) score.

An Eligible Proposal that meets or exceeds the Technical Response minimum threshold requirement will proceed to Stage III.
