## PART 1 – INTRODUCTION

This non-binding Request for Supplier Qualifications (“RFSQ”) is an invitation to obtain Proposals from qualified Proponents for Solar Photovoltaic (“PV”) Systems and Services (“Services”) for the purpose of pre-qualifying prospective Suppliers and establishing Master Agreements for OEM Customers, as defined in Part 1A.2 Definitions, to use on an as-and-when required basis. Refer to Part 2 of this RFSQ for a full description of the requirements.

Master Agreements will not be awarded by a particular geographical area. The Proponents will, however, identify where in the applicable Ontario Zone it is able to provide Solar PV Systems and Services. This information will be shared with Customers, post award, to support their Second Stage Selection Process (“Second Stage”).

This RFSQ does not require the Proponent to submit pricing. During the Second Stage, the Customer will further define their requirements, and specifications and request pricing accordingly. Only Suppliers who are awarded Master Agreements resulting from this RFSQ will be eligible to participate in any such Second Stage. The Second Stage, further outlined in Section 1.5.3, provides opportunities for Suppliers who have the capacity and relevant experience.

This RFSQ is issued by OEM.

### 1.1 Objective of this RFSQ

The objective of this RFSQ is to:

- (a) Establish a list of pre-qualified, quality Suppliers able to provide a wide range of solar Services (e.g., complete design-build, capital repair) to OEM Customers;
- (b) Fulfill Solar PV Service requirements maximizing energy generation based on Customer’s requirements;
- (c) Inform Suppliers of the Customer’s Second Stage process;
- (d) Provide Customers with professional and responsive customer support; and,
- (e) Reduce the costs of associated competitive procurement processes on an ongoing basis (i.e., fewer, of the same, competitive procurement documents issued by Customers).

### 1.2 Supplier Experience and Qualifications

The Supplier shall possess the following relative to the requirements in this RFSQ including, but not limited to:

- (a) Appropriate experience, qualifications, and demonstrated knowledge relative to the requirements in this RFSQ;
- (b) Ability to provide solar-related Engineering, Procurement and Construction (“EPC”) Services;
- (c) Possess applicable professional qualifications, certifications to provide the Services; and,
- (d) Understand and be compliant with applicable standards (e.g., Canadian Standards Association Group (“CSA Group”), Ontario Electrical Safety Code (“OESC”), Institute of Electrical and Electronics Engineers (“IEEE”), Ontario Electricity Safety Code (“OESC”), National Electrical Manufacturers Association (“NEMA”), National Electrical Code (“NEC”), Electrical Safety Authority (“ESA”).

### 1.3 Authorized Reseller

Authorized Reseller means the Original Equipment Manufacturer (“OEM”) has authorized the Supplier to market, advertise, sell, warrant and maintain Solar PV systems and/or components directly to Customers on the OEM’s behalf as a provider.

The Supplier shall be the OEM or an Authorized OEM Reseller of the solar system components, and provide the appropriate resources with associated skills, experience and knowledge to fulfill RFSQ requirements.

Where solar systems are not manufactured directly by the Supplier, the OEM of those systems shall be deemed to be a Supplier’s Subcontractor and the Supplier shall be responsible for providing these.

The Supplier's reseller status shall be maintained throughout the Term of the Master Agreement ("Term"), with any changes of status to be communicated to OECM within thirty (30) days of such change.

## **1.4 Project Background**

### **1.4.1 Historical Spend**

OECM currently has Solar Developer Services agreements in place with four (4) suppliers that expire in January 2024. Approximate purchases through these existing agreements from July 2019 to October 2022 was one million, two hundred thousand dollars (\$1.2M).

Customers using OECM's current agreements are **not**, in any way, obligated to participate in any Master Agreement resulting from this RFSQ.

### **1.4.2 Customer Engagement**

The following Customers were engaged with the development of the Deliverables set out in this RFSQ:

- (a) Humber College Institute of Technology & Advanced Learning;
- (b) Ottawa Carleton District School Board;
- (c) Seneca College of Applied Arts and Technology; and,
- (d) York University.

The above Customers are **not**, in any way, committed to participating in the Master Agreement resulting from this RFSQ.

## **1.5 Award Strategy**

OECM may, through this RFSQ process, enter into Master Agreements with one (1) or more Suppliers for the provision of the Services.

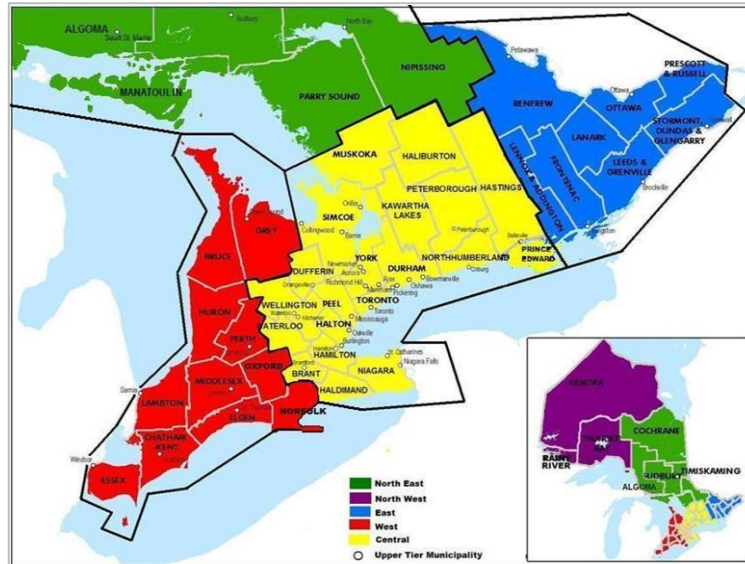

The Term of the resulting Master Agreements are intended to be for five (5) years, with an option in favour of OECM to extend the Term on the same terms and conditions for up to three (3) additional years. Performance as set out in Appendix C – Supplier Performance Management Scorecard and, if applicable, Supplier Recognition Program evaluation results will be considered when contemplating a Master Agreement extension.

Customers participating in the Master Agreements will execute a Customer-Supplier Agreement ("CSA") with a Supplier as attached in Appendix A – Form of Master Agreement. Prior to executing a CSA, the Customer will negotiate their unique requirements and further negotiate with the Supplier and mutually agree to additional terms and conditions (e.g., reporting, Rates specific to the Customer's requirements) ensuring the additional terms and conditions are not in any way inconsistent with the Master Agreement agreed to by OECM and the Supplier.

The Supplier must provide a copy of every CSA to OECM within thirty (30) days of execution.

### 1.5.1 OECM Geographical Locations

OECM Customers, in Ontario, are located in five (5) geographical Zones.

Also refer to Appendix E – OECM School Board, University and College Customers in Ontario illustrating OECM’s educational Customers by Zone.

### 1.5.2 No Contract until Execution of Written Master Agreement

This RFSQ process is intended to identify Proponents for the purpose of negotiation of potential Master Agreements. The negotiation process is further described in Part 3 – Evaluation of Proposals, Section 3.4 of this RFSQ.

**No** legal relationship or obligation regarding the procurement of any Services shall be created between the Proponent and OECM by this RFSQ process until the successful completion of negotiation and execution of a written Master Agreement for the provision of the Services has occurred.

The Master Agreement must be fully executed before the provision of any Deliverables commences.

### 1.5.3 Customer’s Usage of Master Agreements

The establishment and use of the Master Agreement consists of a two (2) part process.

**Part One**, which is managed by OECM, is the creation of the Master Agreement through the issuance of this RFSQ, the evaluation of Proposals submitted in response to it and the negotiation and execution of the Master Agreement.

**Part Two**, the Second Stage is managed by the Customer or by OECM on the Customer’s behalf and is focused on the Customer’s specific needs. Depending on the Customer’s internal policies, and the potential dollar value of the Services a Customer may:

- (a) Select a Supplier, obtain Rates, and sign a CSA; or,
- (b) Seek Rates and other relevant Service information specific to a Customer’s organization (e.g., by issuing a non-binding request via a Second Stage tool (e.g., Request for Services (“RFS”), or Customer’s process (e.g., directly or via an online e-tendering platform)) from the Supplier for their specific Service requirements (e.g., site visits, scheduling, reporting, Rates, invoicing). If selected by the Customer, the Supplier shall provide the Services in accordance with the specifications stated in the Master Agreement and in the Customer’s CSA.

For example, a Customer may issue a Second Stage that requires the following:

- i. Service requirements for assessing the feasibility of installing rooftop solar on one (1) of the Customer's campus buildings with a goal to achieve a total of 400kW in the most efficient manner with the greatest yield in terms of productivity.
- ii. The Supplier shall:
  - Provide a written report;
  - Recommending the number of site visits and attending as scheduled;
  - Review electrical and structural drawings;
  - Provide proof of licensing and Certificate of Authorization in Ontario;
  - Providing proof of insurance including Errors and Omissions insurance of \$5,000,000; and,
  - Provide experienced professional engineers assigned to the project, including resumes illustrating their experience, familiarity, and experience with the types of Solar PV systems being considered, demonstrated experience being the prime consultant/supplier, commitment to meet Customer's timelines, experience, and knowledge with incentives/applications, ability to provide lifecycle costing information and comparisons of different proposed systems.
- iii. Proposed Rates shall be a total cost, excluding Harmonized Sales Tax ("HST").

When a Second Stage request is issued, which does not constitute a contract A, contract B situation, it will identify the required Services or it may request the Supplier to propose appropriate Services to fulfill the Customer's requirements and any other applicable information.

The Customer may negotiate their unique requirements (e.g., site visits, scheduling, reporting, Rates, invoicing) with the Supplier and mutually agree to additional terms and conditions ensuring the additional terms and conditions are not in any way inconsistent with the Master Agreement.

The Supplier must respond to a Second Stage request and, at minimum, the response should set out the following:

- (a) Proposed Services;
- (b) Timelines for Services, reporting, invoicing; and,
- (c) Final, net Rates. The Rates should be valid for a period agree upon with the Customer (e.g., not less than one-hundred and twenty (120) days).

#### **1.5.4 No Guarantee of Volume of Work or Exclusivity of Master Agreement**

The volume information contained in this RFSQ constitutes an estimate and is supplied solely as a guideline to the Proponent. Such information is not guaranteed, represented, or warranted to be accurate, nor is it necessarily comprehensive or exhaustive.

Nothing in this RFSQ is intended to relieve the Proponent from forming its own opinions and conclusions with respect to the matters addressed in this RFSQ. Volumes are an estimate only and may not be relied on by the Proponent.

OECM makes no guarantee of the value or volume of work to be assigned to the Supplier.

The Master Agreement executed with the Supplier may not be an exclusive Master Agreement for the provision of the Deliverables. Customers may contract with others for the same or similar Deliverables to those described in this RFSQ.

Supplier performance means the Supplier meets or exceeds the performance requirements described below and adheres to all the other contractual requirements.

As part of OECM's efforts to provide greater value to Customers, OECM has implemented a Supplier Recognition Program ("SRP"). Through the SRP, OECM will objectively assess Supplier's performance using an open, fair and transparent framework to recognize and reward top-performing suppliers on an annual basis.

To ensure Master Agreement requirements are met, the Supplier's performance will be measured and tracked by OECM to ensure:

- (a) On time delivery of high-quality Services;
- (b) Customer satisfaction;
- (c) On-time Master Agreement activity reporting to OECM;
- (d) On-time CRF remittance; and,

Through consolidation of reporting information, OECM provides Customers a thorough understanding of the Supplier's performance aiding the adoption of the Master Agreement.

By providing the reports, OECM is able to analyze and maintain the integrity of the Supplier's performance.

Failure, by the Supplier, to provide accurate reports by the due dates set out in Appendix B – Supplier Reporting Requirements may be deemed poor performance and will reflect on the Supplier's Performance Management Scorecard and SRP results.

During the Term of the Master Agreement, the Supplier shall collect and report the agreed upon results of the performance measures as requested by OECM. The Performance Management Scorecard and other performance indicators will be used to measure the Supplier's performance throughout the Term of the Master Agreement, ensuring Customers receive appropriate Services on time. The Supplier's performance score will be considered when OECM contemplates Master Agreement decisions such as:

- (a) The approval or rejection of the Supplier's request to add other related Services to the Master Agreement;
- (b) Master Agreement extensions; and,
- (c) Master Agreement termination.

The Supplier shall maintain accurate records to facilitate the required performance management reporting requirements related to OECM and Customer KPIs.

Any penalty and/or reward shall be reported to OECM.

The Supplier must ensure that the requirements of all these Applicable Law are met, and not engage in any form of corrupt practices including extortion, fraud or bribery;
- (e) Ensure that any outsourcing and/or subcontracting used to fulfill Services are identified and approved by the Customer and monitored to ensure compliancy with contractual obligations and adherence to OEMC's SCC. Supplier's employees, subcontractors and other service providers must adhere to the requirements of the SCC, which must be made available as necessary. service providers are paid properly and promptly to avoid any disruption in the provision of Services by the Supplier to OECM or its Customers;

The Supplier is expected to:

- (a) Abide by OECM's SCC;
- (b) Report violations of the SCC or identify any Customer requests that might constitute violations; and,
- (c) Cooperate and collaborate with OECM and bring about the resolution of SCC compliance issues.

Compliance with SCC principles is a criterion that is taken into consideration in OECM's supplier selection process and ongoing performance and relationship management.

The practices adopted by the Supplier must be verifiable. Such verification may be conducted by way of a Supplier's self-evaluation and/or an audit completed by OECM at its discretion. The Supplier must provide, upon request, OECM with documents attesting to their compliance with the SCC.

In addition, OECM may elect to visit the Suppliers' facilities if OECM so chooses. Appropriate notice will be provided to the Supplier.
