

SMART SOUND, SEAMLESSLY INTEGRATED. Meet the Sennheiser TeamConnect Ceiling Medium

Modern workspaces have evolved faster than ever. Teams connect from meeting rooms, classrooms, and studios across the country, with collaboration spanning time zones and platforms. What hasn't changed is the need to hear – and be heard – clearly.

Example of Adaptive Beamforming Technology

At Matrix Video Communications Corp., we understand that sound defines connection. Whether you're designing a hybrid classroom in Sudbury or a corporate meeting suite in Ottawa, clear, reliable audio is the backbone of effective communication. That's why our integration teams rely on the **Sennheiser TeamConnect Ceiling Medium**, a microphone that brings intelligence and precision to every meeting space.

INTELLIGENT BY DESIGN

With more than 80 years of audio innovation behind it, Sennheiser has perfected the art of natural speech capture. The TeamConnect Ceiling Medium uses **adaptive beamforming technology** to automatically locate and follow the active speaker in real time – no need for touch panels, manual switching, or lapel mics. The result is effortless clarity, no matter where someone speaks from in the room.

Meanwhile, TruVoicelift amplifies in-room voices without introducing feedback, helping presenters be heard clearly even at a distance. Intelligent Noise Control manages the background noises, such as HVAC hum, projector fans, shuffling chairs, so conversations stay focused and natural.

INTEGRATION MADE SIMPLE

For integrators, the TeamConnect Ceiling Medium represents efficiency and flexibility in equal measure. It connects through a single cable that carries power, control, and Dante audio, simplifying installation and reducing points of failure. With four different mounting options, including flush, surface, suspended, or ceiling-tile, it fits seamlessly into virtually any design, whether you're modernizing an existing space or outfitting a new build.

Its daisy-chain capability allows up to three microphones to be linked, extending coverage for larger collaboration zones without complicating the network architecture. And with an open API, it integrates smoothly with control systems and camera tracking solutions, creating environments where technology quietly works in the background.

AUDIO THAT DISAPPEARS – AND DELIVERS

Great AV design doesn't call attention to itself – it just works. The Sennheiser TeamConnect Ceiling Medium embodies that idea: discreet in form, powerful in function, and tuned for the way people actually communicate today.

From corporate offices to government facilities and higher education campuses, Matrix is helping clients create spaces that sound as good as they look – places where every voice carries, every word is understood, and technology simply supports the conversation.

ABOUT MATRIX VIDEO COMMUNICATIONS CORP.

Matrix Video Communications Corp. is an OECM Supplier Partner providing **Digital Signage**, **Digital Scoreboards**, and **Audiovisual Systems Solutions** to all Ontario zones. There are many AV solutions that MVCC can offer to fit just about any budget, from simple to sophisticated. With our 31 years of expertise and outstanding relationships with industry-leading brands and distributors, MVCC provides you with reliable hardware at a competitive price point that arrives when you need it.
