

OPTIMIZING UC CONFERENCING WITH BIAMP: A COMPLETE SOLUTION FOR EVERY SPACE

In a hybrid work world, clear and dependable communication matters more than ever. Organizations need conferencing tools that are easy to use, sound great, and work seamlessly with platforms like Microsoft Teams and Zoom. Biamp delivers a full range of unified communications solutions designed to make collaboration simple and effective in any meeting space.

At MVCC, we're proud to partner with Biamp to bring these solutions to our clients. From small huddle rooms to large boardrooms, we help ensure every space is equipped with reliable, high-performance AV technology that just works.

BIAMP'S END-TO-END UC CONFERENCING SOLUTIONS

Biamp provides a fully integrated ecosystem that ensures high-quality audio and video performance across all meeting environments. Their solutions are designed for effortless installation, seamless connectivity, and superior user experience.

Certified Solutions for Microsoft Teams and Zoom

Biamp's conferencing solutions are certified for Microsoft Teams and Zoom, making them ideal for organizations that rely on these platforms for communication. This certification ensures compatibility, ease of use, and consistent audio and video performance.

Devio: The Ideal Solution for Small Meeting Rooms

For smaller meeting spaces and huddle rooms, Biamp’s Devio series offers an all-in-one solution that includes auto-setup features, beamtracking microphones, and plug-and-play USB connectivity. Devio ensures crystal-clear audio, allowing teams to focus on collaboration without worrying about technical difficulties.

Tesira: Scalable AV for Medium to Large Spaces

Biamp’s Tesira platform provides a flexible and scalable solution for mid-sized to large conference rooms. With support for advanced signal processing, beamforming microphones, and networked audio distribution, Tesira enhances speech intelligibility and reduces background noise, creating a professional meeting experience.

Parlé Microphones: Crystal-Clear Audio Pickup

Biamp’s Parlé beamtracking microphones ensure that every voice in the room is heard clearly. Unlike traditional microphones, which require users to stay within a specific range, Parlé microphones track voices automatically, providing seamless audio capture regardless of movement.

Modena Wireless Collaboration

Biamp’s Modena series eliminates the need for cables by enabling wireless content sharing and BYOD (Bring Your Own Device) conferencing. This solution is perfect for hybrid work environments where flexibility is key.

WHY CHOOSE BIAMP FOR UC CONFERENCING?

1. Seamless Integration

We've deployed Audio-Technica products in high-stakes environments like government chambers and corporate HQs—where uptime, speech intelligibility, and clarity are non-negotiable. Certified for Microsoft Teams and Zoom for hassle-free deployment.

2. Superior Audio Performance

Advanced DSP technology ensures clear and natural sound.

3. Scalability

Solutions designed to fit spaces of all sizes, from huddle rooms to large boardrooms.

4. Ease of Use

Plug-and-play functionality and wireless connectivity simplify the user experience.

ENHANCE YOUR MEETING SPACES WITH MVCC AND BIAMP

At MVCC, we specialize in delivering best-in-class AV solutions tailored to your organization's needs. With Biamp's comprehensive lineup of UC conferencing products, we can help you create an efficient, high-quality meeting experience that drives productivity and collaboration.
