Canada Spring / Summer Guide

Are you SURE you have all of the required PPE?

According to Canada's Occupational Health and Safety act; Employers in Canada have a duty to

“take every precaution reasonable in the circumstances to protect workers, including protecting workers from outdoor hazards”

Common illnesses associated with outdoor exposure are West Nile virus, Lyme disease, heat stroke, dehydration, sunburn and even melanoma!

DON'T FORGET

Sqwincher® hydration solutions quickly replace lost fluids containing sodium & potassium, key electrolytes needed to keep the body hydrated.

1008842 Fast Pack® Liquid Concentrate Packet

1012021 Qwik Stik™ Sugar-Free Powder Concentrate Packet

1008830 Liquid Concentrate Bottle

West Nile and Lyme disease are a greater risk for those working outdoors regularly. Protect against disease with **SKETE SAFE**.

FASTBinSM

Our bin stock solutions range from basic pigeonhole bins to complex production-line systems, but all are back by the same-day inventory and hands-on service of our local stores. Choose who monitors the inventory, generates orders, and puts the product away. We will tailor a solution that keeps the right amount of product flowing, when and where you need it.

Canada Spring / Summer Guide

Government

Everyone is trying to drive costs out of the supply chain. Government agencies need the same innovative supply chain management solutions as commercial businesses. Whether it's an Army Mechanical Engineer school or a metro transit authority, Fastenal is deploying industrial supply distribution best practices and supply chain management solutions to solve the Government's inventory management challenges and drive down total costs.

Safety Specialist

The Industrial marketplace continues to provide new challenges for your business and workforce. We want you to know that you can count on Fastenal to provide sound product and process consultation. Our goal is to be your trusted source for solutions that protect your workforce, prevent lost time injuries, and positively impact your company's profitability.

We know that you value your employees and realize that a safe environment increases worker satisfaction and, in turn, productivity. We're here to answer your questions regarding regulations and create an annual plan that will help drive down incident rates and insurance costs. To those ends, Fastenal has created a Safety Specialist program that addresses the core safety challenges your company may face – before they become problems or citations. Please reach out to your local Fastenal rep for more information on working with Fastenal's Safety Specialist.

Manufacturing

At Fastenal Manufacturing, we don't make the common fasteners found on your local Fastenal store shelf — We Make the Unavailable Part Available. That includes everything from complex machined parts and high-volume production fasteners, to large-diameter bolts and complete stud assemblies. Through our nine global manufacturing locations, we produce more than 70,000 jobs per year — each one a solution for a customer in need. Please reach out to your local Fastenal rep for more information on our Manufacturing department.

FAST Solutions Vending

With more than 95,000 machines currently at customer sites, Fastenal is the dominant leader in industrial vending. Why? It's a combination of our innovative technology, our low-cost/no-risk program, and most important of all, our "machine behind the machine" — thousands of local Fastenal personnel making sure each solution is perpetually filled, functioning, and fully optimized.

Product is always immediately available to workers, meaning no stock-outs, no need to track down supervisors for needed supplies, and fewer trips back and forth to centralized storage areas. In turn, crib personnel spend less time "standing and handing," and more time on value-adding activities.

Green Resources

When it comes to protecting the environment, we all have a role to play. The decisions we all make every day will determine what kind of world we live in and future generations inherit. If you're trying to make a difference, Fastenal can help. Please reach out to your Fastenal rep to learn about our recycling programs, and learn tips to conserve energy and keep toxins out of the environment.

Certified Green Products

Many of our products have been certified or recognized by organizations that evaluate and set standards for products with environmental benefits. For more information about these organizations and their certification processes, contact your Fastenal rep.
