

AGREEMENT HIGHLIGHTS

Cloud Technology and Related Professional Services

OECM #2021-376

Item	Description
Agreement Term	Effective Date: March 21, 2022 Initial Expiry Date: March 20, 2025 Optional Extension(s): OECM has the option to extend the agreement for up to two (2) additional periods of up to two (2) years each.
Resources and Services Available Through this Agreement	This agreement provides access to cost-effective cloud computing technology designed to help public sector organizations deploy scalable, on-demand computing infrastructure and platforms. Available solutions cover a broad range of cloud technology resources and associated services, including: Category A - Cloud Computing Technology Access to cloud computing technology products and solutions, including both Infrastructure-as-a-Service (IaaS) and Platform-as-a-Service (PaaS), supported by secure, scalable infrastructure, with managed solutions available. <u>What You'll Get</u> • <i>Infrastructure-as-a-Service (IaaS):</i> storage, virtual machines and virtual networks, including on-demand resources, managed infrastructure, secure remote access and patch management. • <i>Platform-as-a-Service (PaaS):</i> web application hosting, database resources, Domain Name System (DNS) management, content delivery, load balancing, database backup and restore, and related hosting resources. • <i>Cloud technology capabilities and protections:</i> including supplier experience and capabilities, security requirements, North American data residency, data management, service-status monitoring and updates, additional backup services, disaster recovery and business continuity, managed solutions, resource provisioning and other cloud services. Category B - Cloud Technology Related Professional Services A broad range of customizable cloud-related professional services delivered

Item	Description		
	by knowledgeable and qualified resources to support Customer requirements. <u>What You'll Get</u> • <i>Requirement analysis</i>; strategy and roadmap; solution design and architecture; application development and support; technology review and audit; implementation and migration of applications, servers and databases; governance; security; program management; service desk; and other additional services. • <i>Managed Services</i>: management and support of cloud resources or infrastructure, including activities such as migration, security, monitoring, administration and related cloud operations. • <i>Implementation and training planning</i>, account setup and transition support, and a mutually developed Statement of Work outlining activities, timelines, personnel and required Customer resources, as applicable.
