Vocabulary Development

Students are supported in expanding their vocabulary through both direct instruction and exposure.

Reading Passages

Each age-appropriate, highly engaging decodable passage is paired with a shared reading passage on a similar topic, so students can apply phonics learning and reading strategies in context.

Targeted Phonics Focus

Word recognition and decoding skills are improved with explicit phonics instruction aligned to a research-informed scope and sequence.

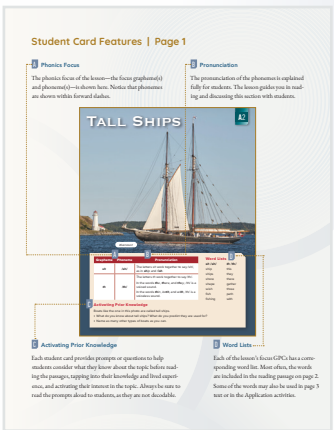

Comprehension and Reading Foundations

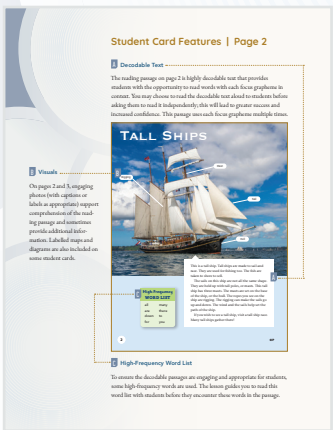

Each lesson addresses many strands of reading, and students can practise comprehension strategies in several activities.
